

Ideation Phase

Empathize & Discover

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: UNESCO World Heritage Site Analysis and Visualization using Tableau

Ideation Phase

Define the Problem Statements

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - <i>what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - <i>what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - <i>what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - <i>how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

Reference: <https://miro.com/templates/customer-problem-statement/>

Example:

Problem Statement(PS)

PS-1

Field	Content
I am (Customer)	A heritage researcher and data analyst.
I'm trying to	Analyze UNESCO World Heritage Sites across different countries and regions using reliable data.
But	The data is large, scattered, and difficult to understand using spreadsheets or static reports.
Because	There is no interactive platform to compare heritage categories, endangered sites, regional distribution, and historical trends in one place.
Which makes me feel	Frustrated because it takes more time to identify meaningful insights and make informed decisions.

PS-2

Field	Content
I am (Customer)	A policymaker, conservation officer, or tourism planner.
I'm trying to	Monitor UNESCO World Heritage Sites and identify endangered locations that require conservation efforts.
But	It is difficult to quickly compare site information, regional statistics, and yearly trends from raw datasets.
Because	The available information is not presented through interactive visualizations and analytical dashboards.
Which makes me feel	Challenged in making timely, data-driven decisions for heritage conservation and tourism planning.

Ideation Phase

Brainstorm & Idea Prioritization Template

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 🕒 10 minutes to prepare
- 🕒 1 hour to collaborate
- 👥 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A  **Team gathering**

Gather all team members and discuss the project objectives. Review the UNESCO World Heritage dataset from Kaggle, understand the available attributes, and assign responsibilities for data preparation, dashboard design, documentation, and testing.

B  **Set the goal**

The primary goal is to design an interactive Tableau dashboard that transforms raw UNESCO heritage data into meaningful visualizations. The dashboard should help users analyze heritage sites by region, category, area, endangered status, and yearly trends.

C  **Learn about the dataset**

Study the dataset by checking column names, data types, missing values, and geographical fields. Understand important attributes such as Site Name, Country, Region, Category, Area (Hectares), Year of Inscription, and Danger Status before beginning dashboard development.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we develop an interactive Tableau dashboard to effectively analyze and visualize UNESCO World Heritage Sites, enabling users to explore heritage distribution, endangered sites, regional comparisons, and historical trends for better understanding and decision-making?

Key rules of brainstorming

To run a smooth and productive session

 Stay in topic.	 Encourage wild ideas.
 Defer judgment.	 Listen to others.
 Go for volume.	 If possible, be visual.
 Everyone contributes.	 Build on others' ideas.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

You can select a sticky note and hit the pencil (listen) icon which icon to start drawing!

Anusha

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP

Add comparable tags to sticky notes to make it easier to find, browse, organize and share categories, or individual notes as themes within your mural.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
