

PROBLEM–SOLUTION FIT CANVAS 2.0

PURPOSE / VISION

To provide an interactive and user-friendly Tableau dashboard that helps students, researchers, tourists, and heritage organizations explore, analyze, and understand UNESCO World Heritage Sites through meaningful visualizations and data-driven insights.

HERITAGE TREASURES

AN IN-DEPTH ANALYSIS OF
UNESCO WORLD HERITAGE SITES
IN TABLEAU

Define CS, fit into CC

1. CUSTOMER SEGMENT(S)

CS

- Students and Researchers
- Tourists and Travelers
- Historians and Archaeologists
- UNESCO Organizations
- Government Heritage Departments
- Data Analysts and Educators

*Who is your customer?
i.e. working parents of 0-5 y.o. kids*

6. CUSTOMER CONSTRAINTS

CC

- Lack of technical knowledge.
- Limited access to interactive data.
- Difficulty comparing multiple countries.
- Time required for manual analysis.
- Large and complex datasets.

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.

5. AVAILABLE SOLUTIONS

AS

- UNESCO Official Website
- Kaggle Datasets
- Google Search
- Research Papers
- Static Reports
- Excel Sheets
- Government Publications

Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking

Explore AS, differentiate

Focus J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS

J&P

- Explore UNESCO World Heritage Sites worldwide.
- Analyze heritage site distribution by country and region.
- Identify endangered heritage sites.
- Understand historical trends in World Heritage listings.
- Compare Cultural, Natural, and Mixed heritage sites.
- Make data-driven decisions using visual analytics.

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

9. PROBLEM ROOT CAUSE

RC

- Heritage information is distributed across multiple sources.
- Large datasets are difficult to interpret manually.
- Limited interactive visualization for analysis.
- Existing reports are mostly static and less user-friendly.

*What is the real reason that this problem exists?
What is the back story behind the need to do this job?
i.e. customers have to do it because of the change in regulations.*

7. BEHAVIOUR

BE

- Search for UNESCO information online.
- Download heritage datasets.
- Compare countries and regions.
- Explore dashboards.
- Analyze charts and maps.
- Share findings in reports or presentations.

*What does your customer do to address the problem and get the job done?
i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)*

Focus on J&P, tap into BE, understand RC

Identify, Group TR & EM

3. TRIGGERS

TR

- Need for heritage research.
- Academic projects and presentations.
- Tourism planning.
- UNESCO conservation studies.
- Interest in global cultural heritage.
- Requirement for interactive data visualization.

4. EMOTIONS: BEFORE / AFTER

EM

Before: Confused due to scattered heritage information, difficult to analyze large datasets, time-consuming manual research.

After: Confident, informed, better understanding of UNESCO heritage trends, easy decision-making through interactive dashboards.

10. YOUR SOLUTION

SL

Develop an interactive Tableau dashboard named **"Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites"** that enables users to:

- Visualize UNESCO World Heritage Sites on maps.
- Filter by region, country, year, and heritage category.
- Identify endangered heritage sites.
- Analyze trends over time.
- Forecast future heritage growth.
- Generate meaningful insights through interactive dashboards and visualizations.

*If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.
If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.*

8. CHANNELS of BEHAVIOUR

CH

8.1 ONLINE

- Tableau Public
- UNESCO Website
- Kaggle
- Google Search
- Academic Journals
- Educational Websites

8.2 OFFLINE

- Universities
- Libraries
- Museums
- Heritage Organizations
- Tourism Offices

Project Design Phase-II

Problem- Solution Fit Template

Date	31 January 3035
Team ID	SWUID2026201734
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau project title
Maximum Marks	4 Marks

Problem Solution Fit Template:

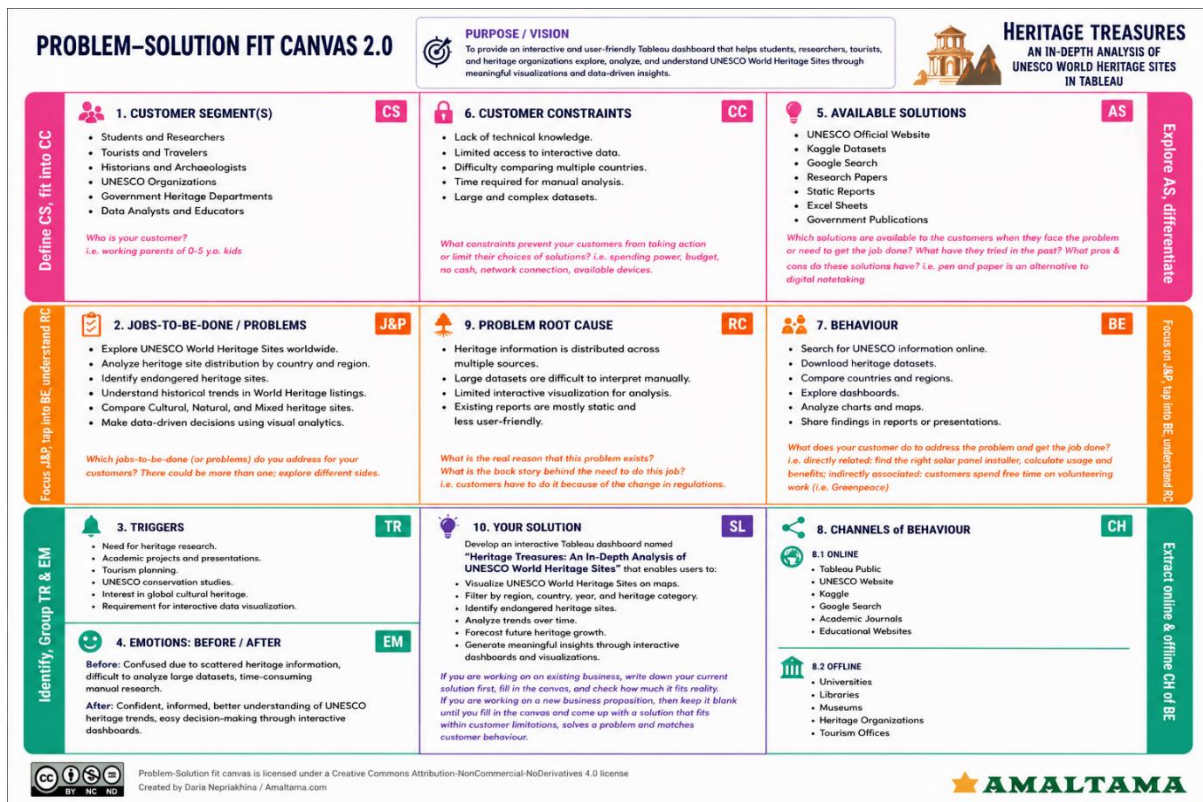

Problem: Large UNESCO datasets are difficult to interpret using traditional reports.

Objective: Transform raw data into meaningful visual insights.

Input: UNESCO heritage dataset, country details, category, year, location.

Process: Collect data, clean data, connect Tableau, create visualizations, build dashboards, validate results, publish dashboards.
